Being able to identify normal and abnormal ECG findings is an essential skill in primary care but is something that can feel more challenging as time elapses after hospital training posts. This interactive half-day session led by a cardiologist and open to GPs, ANPs and practice nurses will provide an opportunity to update and re-invigorate confidence in interpreting 12 lead ECGs in primary care as well as providing advice on subsequent management. During the afternoon there will be scope to re-visit the practicalities of actually doing an ECG as a further aid to understanding and interpreting them.

Key Benefits

- Short lecture and group work
- Revision of ECG basics
- Observe and practice performance of ECGs
- Interactive clinical scenarios based on the common cardiac symptoms
- Case-based discussion

Duration
This course will run on the 16th June 2015 between 1.30 and 4.30pm.

Course Convenors
Dr Alexander Simms
Locum Consultant in Cardiology, Leeds teaching Hospital NHS Trust and University of Leeds

Who can enrol for this programme?
This programme is aimed at GPs as well as practice nurses and nurse practitioners.
Date
This programme will run on the 16th June 2015 between 2.00 pm - 5.00 pm.

Fees
£70 GPs, £65 for RCGP members/HYMS tutors, £55 practice nurses/ANPs

HYMS reserves the right to cancel short courses if the number of delegates is insufficient to run the course
